

WheelAir Cooling Backrest

- By dispersing air evenly across your back using the patented channel technology, it helps avoid symptoms caused by overheating and over sweating while keeping skin dry and clean.
- Through active airflow, WheelAir allows for self regulation of the body temperature through convection, conduction and evaporation heat loss.
- 7-20 hours of battery life depending on setting
- Charges in 17 Hours from dead to full (overnight).
- 4 fan setting controlled by remote discretely attached to backrest

Warranty Information

- 1 Year

WheelAir
